## GFRG/GFRC COLUMN COVERS

**CURVE-FX™ Column Covers liberates architects to explore boundless design possibilities for column coverings, offering construction experts a versatile material to seamlessly transform these creative visions into tangible architectural masterpieces.**

Introducing CURVE-FX™ Column Covers, the future of architectural design and execution. Crafted from Glass-Fibre Reinforced Gypsum (GFRG).

CURVE-FX™ is our premier solution for customizing column covers and architectural features and details.

It empowers architects with the freedom to envision any shaped column cover, while providing construction professionals with a material that effortlessly translates these visions into reality.

Beyond its versatility, CURVE-FX™ boasts a unique blend of strength and durability, all while remaining lightweight and user-friendly.
