CUSTOM RADIUS FEATURES

CURVE-FX™ Radius Features empowers architects with the freedom to envision any curved ceiling shape, while providing construction professionals with a material that effortlessly translates these visions into reality.

Introducing CURVE-FX™ Curved drywall and radius features, the future of architectural design and execution.

Crafted from Glass-Fibre Reinforced Gypsum (GFRG), CURVE-FX™ is our premier solution for customizing curved walls and architectural features.

CURVE-FX™ Column Covers empower architects with limitless design options, while providing professionals a versatile material to turn these visions into reality. Plus, their streamlined installation process makes them the top choice.

For projects demanding radius details or organic forms, Our CURVE-FX™ stands out as the optimal choice.
