

WOOD FIBRE ACOUSTIC WALL & CEILING PANELS

ACOUSTEX PLANK

Acoustex-Plank provides an exceptional solution for creating dynamic and functional interior spaces. With a focus on versatility and performance, they offer a unique blend of durability and acoustic efficiency; perfect for a wide range of applications

Designed to withstand rigorous use while effectively reducing noise, Acoustex-Plank panels are recognized for their reliability and their positive impact on indoor air quality.

Manufactured without asbestos and free from mineral wool fibers, they contribute to a healthier indoor environment.

They are the preferred choice for architects and designers seeking a reliable, high-performance solution that combines aesthetic appeal, acoustic efficiency, and environmental friendliness. The innovative combination of proven construction materials ensures a robust, decorative acoustical panel.
